

Strategic sites with capacity of > 100 homes
 Indicates number of individual smaller sites in or adjacent to specified town or village for illustrative purposes

Map illustrating potential forced housing sites in Thanet for period up to 2031.

The map is based on TDC's Housing Land Availability Assessment (SHLAA), compiled in 2013, providing the authority with its evidence base for future housing supply. It provides a graphic snapshot of Thanet's future if the airport site is not allocated, the Local Plan is delayed, and (as a result) Thanet is required to adopt the Government's much higher figure for housing need. By including the former Manston airport site, many of these sites will be saved from development

The absence of sufficient brownfield sites will mean acres of countryside and greenfield sites in your backyard being destroyed. Is that what Thanet wants?
